### DETAILED ACTION

#### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 5 ~ 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Putney.

Regarding claims 1, 7 and 8, Putney discloses a bending beam torque wrench comprising a main body 51 and a strain gauge 46 mounted in the main body, wherein the main body is provided with an opening 56, 57 to enhance flexibility of the main body and to increase deformation of the strain gauge (See Col. 3 and 4, lines 50 ~ 62 and 1 ~ 10) wherein the strain gage 46 is integrally mounted in the opening (See Fig. 4, See Col. 4, lines 6 ~ 8).

Regarding claims 5 and 6, the opening 56 of the main body has a rectangular shape (See Col. 4, lines 6 ~ 8).

Regarding claim 9, a cover 70 is directly mounted on the main body in a riveting manner (See Figs. 1 and 2).

#### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Page 3

4. Claims 2 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Putney in view of Kroll et al.

Regarding claims 2 and 10, Putney discloses all of the limitations of these claims except for a teaching that the opening extends through a longitudinal length of the main body. However, Kroll et al disclose a double ended shear beam load cell 10 comprising a main body 11 that includes a longitudinally extending opening 16 (See Fig. 1, See Col. 2, lines 64 - 69).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Putney according to the teachings of Kroll et al for the purpose of providing a stress isolation member with minimum thickness allowing strain gauge means to be placed as closely as possible to the neutral axis of the center beam, while maintaining the strength of the overall structure to prevent over bending or breaking (See Kroll et al, See Col. 3, lines 17 - 20).

### *Allowable Subject Matter*

5. Claim 3 is allowed.

### *Response to Arguments*

6. Applicant's arguments with respect to these claims have been considered but are moot in view of the new grounds of rejection.

### *Conclusion*

Rittman (4,982,612) teaches a torque measuring wrench with electronic means for measuring torque..

Becker et al (4,643,030) teach a torque measuring apparatus.

Becker (6,070,506) teaches a clutching electronic torque wrench.

Curry (6,796,190) teaches an electronic torque wrench.

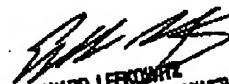

Jenkins (6,276,243) teaches an electromechanical releasing torque wrench.

7. Any inquiry concerning this communication should be directed to Examiner Octavia Davis at telephone number (571) 272 - 2176. The examiner can normally be reached on Monday - Thursdays (9:00 - 5:00), Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Lefkowitz, can be reached on (571) 272 - 2180. The fax phone number for the organization where this application or proceeding is assigned is (703) 872 - 9306.

FILING RECEIPT

0C00000010907792\*

Date Mailed: 09/23/2008

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Filing Receipt Corrections, facsimile number 703-746-9195. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).
